Certification

edX | UCI

Aug 2023 - Nov 2023

Full-Stack Web development bootcamp
- MERN Stack certification

Bachelor's of Science: Biochemistry

Loyola Marymount University

2011-2015

PROFILE

With a foundation in React development gained through hands-on experience at Nexalure since January of this year, possesses real-world expertise in crafting dynamic and responsive web applications. Recognized for collaboration with cross-functional teams, known for adaptability, self-starting attitude, and commitment to continuous learning. Demonstrates passion for staying abreast of evolving technologies, contributing innovative solutions, and maintaining a strong foundation in web development principles. Positioned to contribute to team success by delivering high-quality, user-centric applications.

WORK EXPERIENCE

Front End Developer

Nexalure Technologies   2024 - Current
London, England

- Spearheaded the development of responsive and modern web applications, serving in the capacity of a developer.
- Demonstrated leadership by taking on responsibilities akin to a team lead, providing guidance to teammates in understanding programming languages and complex concepts.
- Proficiently utilized a tech stack encompassing React, TypeScript, Node.js, SCSS, Sketch, and Git to deliver high-quality web solutions.
- Actively engaged in code reviews and pair programming within an international team, often taking the lead role in assisting team members and sharing valuable insights.
- Facilitated collaborative problem-solving in a large team setting, effectively addressing GitHub issues through clear and specific communication strategies.
- Played a pivotal role in overcoming challenges by independently troubleshooting and then sharing insights with the team, contributing to a culture of continuous learning.

PROJECTS

Will Do: Crush your Goals   </> CODE

MERN stack application to help users track and accomplish their goals

- Technologies:
  - Front-End: React.js, D3.js, CSS
